INDRIX - INclusive Disaster Resilience Index

The following questionnaire is part of the "INDRIX: Inclusive Disaster Resilience Index" project, co-funded through the European Commission's DG ECHO programme "Prevention and Preparedness". The primary objective of INDRIX is to construct and test a social resilience index useful in the prevention of natural disasters.
INDRIX is also planned to be used as a basis for measurement and evaluation of social resilience in the context of European projects.
The following is a draft questionnaire to assess projects within this framework. The replies will primarily be analysed with the improvement of the questionnaire as such in mind.

Considering the work of your project, we kindly ask you to respond to this questionnaire and thereby give us your feedback on some aspects of INDRIX. In particular, we ask you to reflect on aspects of your project regarding social vulnerability, social cohesion and the risk management process. In answering, we ask you to focus only on the communities and territories that have been the subject of your project and/or affected by it.

More information about INDRIX is available at: http://indrix.samaritan-international.eu/

* Required

1. **Title of your project** *

   _____

2. **Acronym of your project** *

   _____

3. **My project addresses the following phases of emergency management** *
   Check all that apply.

   ☐ Mitigation/Prevention

   ☐ Preparedness

   ☐ Response

   ☐ Recovery

   ☐ Other: _____

Social vulnerability

These following aspects concern some basic conditions in the population that could affect social disadvantage in crisis situations. Does your project consider one or more of the following elements related to social cohesion? To what extent?

4. **The level of education of people in areas where it is active** *

   Mark only one oval.

	1	2	3	4	5	
Not considered	◯	◯	◯	◯	◯	Completely/Central part of the project

5. **The health of citizens / the quality of health services** *

   Mark only one oval.

	1	2	3	4	5	
Not considered	◯	◯	◯	◯	◯	Completely/central part of the project

6. **Do you think your project has had an impact on the health of the population, or has it improved the quality of health services in the area?** *

   Mark only one oval.

	1	2	3	4	5	
Definitely not	◯	◯	◯	◯	◯	Definitely

7. **The living conditions of the younger population** *

   Mark only one oval.

	1	2	3	4	5	
No	◯	◯	◯	◯	◯	Completely/central part of the project

8. **Does your project also target people in unemployment condition or low income** *

   Mark only one oval.

	1	2	3	4	5	
Not considered	◯	◯	◯	◯	◯	Completely/central part of the project

Social cohesion

Relational networks which involve individuals and the cultural and financial capital at the networks' disposal constitute an important resource which enables said individuals to pursue their own goals. Does your project consider one or more of the following elements related to social cohesion?

9. **The presence of many different associations in the area** *

Mark only one oval.

	1	2	3	4	5	
Not considered	◯	◯	◯	◯	◯	Completely/central part of the project

10. **The active participation of citizens in the community** *

Mark only one oval.

	1	2	3	4	5	
Not considered	◯	◯	◯	◯	◯	Completely/central part of the project

11. **The use of IT and the possibility of internet access in the area** *

Mark only one oval.

	1	2	3	4	5	
Not considered	◯	◯	◯	◯	◯	Completely/central part of the project

The risk management process

The four phases of the process (prevention, preparedness, response, recovery) are the basis for understanding whether a community is increasing its own capacity for social resilience. For each of these phases, we ask you to reflect on some aspects related to your project:

12. **Does your project consider the development of a public communication campaign focused on the prevention of natural disasters?** *

Mark only one oval.

◯ Yes

◯ No

◯ Other: _____

13. **Do you think that, after your project, the citizens of the areas where the project is active are more informed about natural disasters?** *

Mark only one oval.

	1	2	3	4	5	
Definitely not	◯	◯	◯	◯	◯	Definitely

14. **Does your project (or a part of it) promote public initiatives (meetings, assemblies) focused on the prevention of natural disasters?** *

Mark only one oval.

	1	2	3	4	5	
Definitely not	◯	◯	◯	◯	◯	Definitely

15. **Do you think that your project will provide citizens with more opportunities to receive important information in the event of a natural disaster?** *

Mark only one oval.

	1	2	3	4	5	
Definitely not	◯	◯	◯	◯	◯	Definitely

16. **Do you think that your project helps citizens to know the activities related to civil protection in the area?** *

Mark only one oval.

	1	2	3	4	5	
Definitely not	◯	◯	◯	◯	◯	Definitely

17. **Do you think your project contributes to improving the relationship between citizens and the municipality in the event of natural disaster?** *

Mark only one oval.

	1	2	3	4	5	
Definitely not	◯	◯	◯	◯	◯	Definitely

18. **Do you think that, thanks to your project, citizens are better informed about the civil protection plans of the area?** *

Mark only one oval.

	1	2	3	4	5	
Definitely not	◯	◯	◯	◯	◯	Definitely

19. **In conclusion, do you think the previous questions contain information about the degree of resilience of a territory or the resilience delivered to that territory by your project? Please let us know your comments (with examples, if possible):**
